

Executive Summary

ColossusIQ is an AI-powered learning, training and career-development platform for colleges and institutions. It brings **course delivery, quizzes, assignments, certificates, internships, mock interviews and placement tracking** into one integrated system, with a dedicated admin console for the organization. It replaces scattered spreadsheets, WhatsApp groups and manual follow-ups with a single, auditable workspace, and focuses on improving student **employability, skills and career readiness**.

The Problem Every Institution Faces

Slow Course Creation

Building curriculum, quizzes and notes by hand takes faculty weeks of effort.

Scattered Communication

Notices, timetables and meeting links are lost across WhatsApp groups and posters.

Placement Blind Spots

No single view of student readiness, projects, certificates and placement status.

Weak Oversight

Disconnected spreadsheets make staff activity, student progress and at-risk learners hard to track.

Platform at a Glance

Area	What It Does	What It Means for Your Institution
AI Course Builder	Generates course structure, lessons, notes and quizzes from a topic	Courses ready in minutes, then reviewed before release
Secure Assessments	Timed quizzes with attempt limits and malpractice monitoring	Credible results and controlled retakes
Career Suite	Internships, mock interviews, resume and placement tools	Students graduate job-ready
Admin Console	Departments, staff, students, reports and approvals	Full visibility from one dashboard
Branded Portal	Own web address, colours and landing page	Feels like the college's own system

Who Uses It

Role	Key Features	Primary Benefit
Organization Admin	Dashboard, departments, staff, students, course publishing, KPI reports, placements	Institution-wide control and approvals
Department Admin / Staff	Staff workboard, classes, attendance, assignments, grading, schedule	Department-level delivery without admin overhead
Student	Assigned courses, assignments, notices, meetings, career and internship tools, support tickets	One portal for learning and career growth

All-in-One

Learning · Assessment · Placement

Why ColossusIQ?

- One integrated system instead of many tools
- AI assistance built into courses, projects and interviews
- Approval workflow keeps quality in your hands
- Placement and KPI data ready for audits

Quality Control Built-In

Staff review every course and quiz first. Nothing reaches students until the Organization Admin approves it.

Academic & Learning Modules

Module	What It Does	Impact
Departments	Create academic units and assign department staff with course-creation quotas	Content routed to the right learners
Students	Add individually or bulk upload from an Excel template; filter by department and class	Whole cohorts onboarded in one step
Course Creation	Manual setup or AI generation with module count, content format, writing style and course language	Custom or syllabus-aligned courses fast
Quiz & Exam Mode	Pass %, attempt limit, cooldown, questions per attempt; camera, mic, tab-switch, fullscreen, copy/paste monitoring	Secure, trustworthy results
Resource Library	Share PDFs (up to 10MB), links, slides and videos by department	Study material in one hub
Assessment Desk	Create assignments; track active, overdue, due-soon and needs-review work	Deadlines and grading under control
Projects & Labs	AI-generated phased projects with guidance, tags and due dates	Portfolio-grade practical work
Sessions & Notices	Schedule live meetings with a join link; post targeted, pinned notices	No missed briefings or circulars
Quiz Retakes & Certificates	Approve or reject retake requests; release certificates only after course, quiz and assignments are complete	Academic integrity protected

Career & Placement Modules

Module	What It Does	Impact
Internship Program	Catalog across six domains plus custom programs; AI builds a 4-week practical roadmap	Industry-style training at scale
Mock Interview Hub	Training drives by role, skills, level and difficulty; readiness toggles and evaluation	Students practise before real interviews
Career Readiness	Auto-calculated readiness score from resume, projects and profile links; portfolio review	Verify student claims quickly
Placement Portal	Recruiters, placement team, internal and outside candidates, placement documents	Complete placement operations
KPI Reports	Year and department filters, readiness chart, student ledger, Export to Excel	Audit-ready reporting

How a Course Goes Live

- 1. **Create** manually or generate with AI
- 2. **Review** content, notes and quiz settings
- 3. **Take the review quiz** to check the exam
- 4. **Send to Admin Approval**
- 5. **Organization Admin approves**
- 6. **Students see the course**

Inside Every Course

- Chapter notes beside each lesson
- 24/7 AI course assistant for student doubts
- Progress tracking and certificate on completion

Internship Domains

- Computer Science & IT
- Mechanical & Automotive
- Electrical & Electronics
- Civil & Structural
- Medical & Healthcare
- Business & Management

Key Platform Facts

- Role-based dashboards for admin, staff and students
- Bulk student onboarding from Excel
- Notices and resources targeted by department
- Own portal address and branding

Custom programs
Need a niche specialization? Use AI Generate to build a custom internship program.

Admin Control, Branding & Insights

Capability	What It Does	Impact
Portal Customization	Unique portal address, brand colours, hero title, banner image, About section and recruiter logos	Institution-branded public portal
Staff Quotas & Limit Requests	Set course-creation limits per staff member; review and approve extension requests	Fair use of platform resources
Staff Login Activity	Login times, roles and IP addresses with search and period filters	Security and audit visibility
Support Centre	Student and staff tickets with chat-style replies and Mark Resolved	One helpdesk, full history
Analytics & Reporting	Average completion, at-risk students, enrollment, engagement and progress per learner, with export	Spot struggling students early

Benefits for Your Institution

Centralized Data
Student credentials, mappings and records in one secure place.

Real-Time Tracking
Live view of enrollment, progress and placements.

Placement Transparency
Accurate, updated placement records to show institutional value.

Resource Control
Course limits per staff member prevent over-allocation.

Accountability
Permanent record of support, approvals and activity.

Scalability
Add new departments and branches as the institution grows.

How to Get Started — 3 Steps

STEP 1
Enquire

- Submit the organization enquiry form at www.colossusiq.ai
- Discuss your departments and goals

STEP 2
Set Up

- Configure your branded portal
- Add departments and staff
- Bulk upload students from Excel

STEP 3
Launch

- Create or AI-generate courses
- Approve and publish to students
- Track KPIs and placements

Reports You Get

- Student KPI report with Excel export
- Placement readiness distribution
- Comprehensive learner report
- Staff login history
- Quiz and assignment status
- Department placement analytics

Reports can be filtered by academic year and department, ready for compliance reviews, board meetings and recruiter sharing.
